

## Our product portfolio

Well-engineered, total solutions from Rösler.

Product <b>1</b>	The all around trouble-free package. <b>Mass Finishing</b>	
Product <b>2</b>	State-of-the-art technology. <b>Shot Blasting</b>	
Product <b>3</b>	High component uptimes. <b>Aerospace</b>	
Product <b>4</b>	Perfect, down to the last detail. <b>Plastic deflashing</b>	
Product <b>5</b>	For clean work pieces. <b>Industrial washing machines</b>	
Product <b>6</b>	Our tools. <b>Media and compounds</b>	
Product <b>7</b>	The All-in-One solution. <b>Additive Manufacturing</b>	

## Rösler – finding a better way ...

Your specialist for surface treatment solutions

For over 80 years the Rösler group has been active in the field of surface finishing and preparation by providing innovative **mass finishing and shot blasting technologies**. The company offers by far the most comprehensive equipment, consumables and service portfolio in the world. Renowned manufacturers in many industries rely on Rösler products and services.

With 15 branch offices and over 150 distributors with sales agents around the world, the Rösler group offers a global sales and service network; always in close vicinity to our customers.

Our team of specialists can handle the engineering of a tailor-made, stand-alone machine concept or a complete manufacturing line. This ensures that you are always taken care of, from the initial planning phase to the commissioning and beyond – throughout the entire lifetime of your machinery!

## MASS FINISHING

Always in good hands: From equipment, to media and compounds.

Is the surface of your work pieces too rough for downstream processing? Or do your medical components have different finishing requirements on different surface areas? Irrespective of how big a challenge may be, with our decades of know-how in the field of surface treatment, combined with our global network of well-equipped test centers and our process specialists, we will develop a solution that is best for your finishing needs!

### Processing possibilities:

Deburring, cleaning, de-oiling, degreasing, descaling, surface smoothing, brightening, RÖSLER Keramo-Finish®, ball burnishing, pressure deburring, edge radiusing, surface grinding, ISF®-REM super finishing, finishing of small wood components, etc.

## SHOT BLASTING

Higher uptimes, less time for maintenance work, perfect process stability.

Do your work pieces require an especially high compressive residual stress, or are you looking for a solution for blast cleaning, paint stripping or surface preparation? Sand and scale must be removed from your castings? Are you treating aerospace components, castings, forgings or components for steel construction/steel trading companies? Our surface treatment specialists will assist you with your special requirements. And in our test centers around the world we will, jointly with you, develop the optimum treatment process.

### Processing possibilities:

Deburring, descaling and de-rusting, de-sanding, surface profiling/roughening, applying a mat finish, surface smoothing, edge radiusing, shot peening and many more.

Central training center for the Rösler group.

The Rösler Academy is the **central training center** of the Rösler Oberflächentechnik GmbH. It offers you **practical training courses** in the fields of mass finishing, shot blasting and **lean management**. With the training program of the Rösler Academy we want to effectively transfer our knowledge and, thus, support you with our comprehensive know-how.

Your partner for post processing & surface finishing.

**Additive Manufacturing** is increasingly utilized for volume production of standard components. **Post processing and surface finishing** of additive manufactured parts is not only a technical challenge but also represents a significant factor in the value-added manufacturing chain. Under the Rösler brand name "AM Solutions" our experts offer you a wealth of excellent treatment options along the complete AM process, which can be easily adapted to your individual requirements.
